

July

HOME MAINTENANCE CHECKLIST

- Tackle mold growth, inspect, and clean grout, replace caulk, and ensure proper sealing to combat moisture.
- Wash windows for a better view and clean door screens to keep the fresh air coming and the bugs out.
- Be sure your home's gutters direct stormwater away from the foundation, preventing potential water damage.
- Revisit your HVAC filters to boost air quality - especially important if you have pets or family members with allergies.
- Stock up on citronella candles or invest in a bug zapper to enjoy time outside sans bugs.
