FLOOD RISK

Flood risks in New Jersey are growing due to the effects of climate change. Coastal and inland areas may experience significant flooding now and in the near future, including in places that were not previously known to flood. For example, by 2050, it is likely that sea-level rise will meet or exceed 2.1 feet above 2000 levels, placing over 40,000 New Jersey properties at risk of permanent coastal flooding. In addition, precipitation intensity in New Jersey is increasing at levels significantly above historic trends, placing inland properties at greater risk of flash flooding. These and other coastal and inland flood risks are expected to increase within the life of a typical mortgage originated in or after 2020.

To learn more about these impacts, including the flood risk to the Property, visit njreal.to/flood-disclosure. To learn more about how to prepare for a flood emergency, visit njreal.to/flood-planning.

129. Is the Property subject to any requirement under federal law to obtain and maintain flood insurance on the Property?

Properties in the special flood hazard area, also known as high risk flood zones, on FEMA's flood insurance rate maps with mortgages from federally regulated or insured lenders are required to obtain and maintain flood insurance. Even when not required, FEMA encourages property owners in high risk, moderate risk, and low risk flood zones to purchase flood insurance that covers the structure and the personal property within the structure. Also note that properties in coastal and riverine areas may be subject to increased risk of flooding over time due to projected sea level rise and increased extreme storms caused by climate change which may not be reflected in current flood insurance rate maps.

☐ ☒ ☐

130. Have you ever received assistance, or are you aware of any previous owners receiving assistance, from FEMA, the U.S. Small Business Administration, or any other federal disaster flood assistance for flood damage to the Property?

For properties that have received federal disaster assistance, the requirement to obtain flood insurance passes down to all future owners. Failure to obtain and maintain flood insurance can result in an individual being ineligible for future assistance.

☒ ☐ ☐

131. Is there flood insurance on the Property?

A standard homeowner's insurance policy typically does not cover flood damage. You are encouraged to examine your policy to determine whether you are covered.

☐ ☐ ☒

132. Is there a FEMA elevation certificate available for the Property? If so, the elevation certificate must be shared with the buyer.

An elevation certificate is a FEMA form, completed by a licensed surveyor or engineer. The form provides critical information about the flood risk of the Property and is used by flood insurance providers under the National Flood Insurance Program to help determine the appropriate flood insurance rating for the Property. A buyer may be able to use the elevation certificate from a previous owner for their flood insurance policy.

☐ ☒ ☐

133. Have you ever filed a claim for flood damage to the Property with any insurance provider, including the National Flood Insurance Program?

If the claim was approved, what was the amount received? \$ _____

☒ ☐ ☐

134. Has the Property experienced any flood damage, water seepage, or pooled water due to a natural flood event, such as heavy rainfall, coastal storm surge, tidal inundation, or river overflow?

If so, how many times? 1

135. Explain any "yes" answers that you give in this section: The basement was flooded once in 2022 during construction when the basement door was not installed.
